Hills M2 Road Works

16 April 2010

Motorists who use the Hills M2 motorway after 9:00pm at night are being urged to plan their journey during essential maintenance work starting Tuesday 27 April through to the end of August.

A spokesperson for Hills M2 said that the work on the motorway will involve the grinding off and re-laying of the road surface. This work is required to ensure that the M2 maintains its high standards of safety and provides a smoother ride for motorists.

“The resurfacing work will occur at the motorway’s main interchanges and along the main carriageway,” the spokesperson said.

The essential maintenance work will be undertaken after hours and will involve some lane closures, with minimal impacts on the motorway’s entry and exit ramps.

The spokesperson said that lane and ramp closures will be advertised via on road variable message signs (VMS) with up to date information. This information will also be updated on the Hills M2 website, where motorists can also register for Work Alert updates to help them plan their travel ahead of time.

To minimise traffic impacts, work will take place from 9:00pm to 5:00am the next morning.

The spokesperson said that residents living adjacent to the work sites will be impacted by the noise of work.

“While all efforts will be made to minimise the impact of the work on the community, some level of disruption is inevitable.

“Delays are expected during the works, so we ask that motorists be patient and observe the motorway signage while we work to improve the motorway”, the spokesperson said.

The schedule may change for operational reasons or bad weather. Motorists are advised to take notice of roadside VMS and check www.hillsm2.com.au particularly if they travel at night after 9:00pm.

The management of Hills M2 apologise for any inconvenience caused during this time.
